## **9. Presence in social networks (social media)**

We maintain online presences within social networks and process user data in this context in order to communicate with users active there or to offer information about us.

We would like to point out that user data may be processed outside the European Union. This may result in risks for the users because, for example, the enforcement of the users' rights could be made more difficult.

Furthermore, user data is usually processed within social networks for market research and advertising purposes. For example, usage profiles can be created based on the usage behavior and resulting interests of the users. The usage profiles can in turn be used, for example, to place advertisements within and outside the networks that presumably correspond to the interests of the users. For these purposes, cookies are usually stored on the users' computers, in which the usage behavior and interests of the users are stored. Furthermore, data independent of the devices used by the users may also be stored in the usage profiles (especially if the users are members of the respective platforms and are logged in to them).

For a detailed presentation of the respective forms of processing and the options to object (opt-out), we refer to the privacy statements and information provided by the operators of the respective networks.

In the case of requests for information and the assertion of data subject rights, we would also like to point out that these can be asserted most effectively with the providers. Only the providers have access to the users' data and can take appropriate measures and provide information directly. If you still need help, you can contact us.

Data subjects: Users (e.g., website visitors, users of online services).
